InfiniTime™ Online 7.0 - Hosted Solution

InfiniTime™ Online 7.0 is the fully hosted version of InfiniTime™ 7.0. Now integrated with the efficiency of the internet, InfiniTime™ Online 7.0 is the most powerful labor management service available! Your organization can now streamline its labor management via a securely hosted website. Simply log into <http://www.InfiniTimeOnline.com> from anywhere in the world to view timecards, schedule employees, edit activity, export to payroll and more.

This is done without having any of the software actually installed on your computer. Instead, your company's profile is stored on the highly secure servers at the Inception Technologies Data Center in Glendale, AZ.

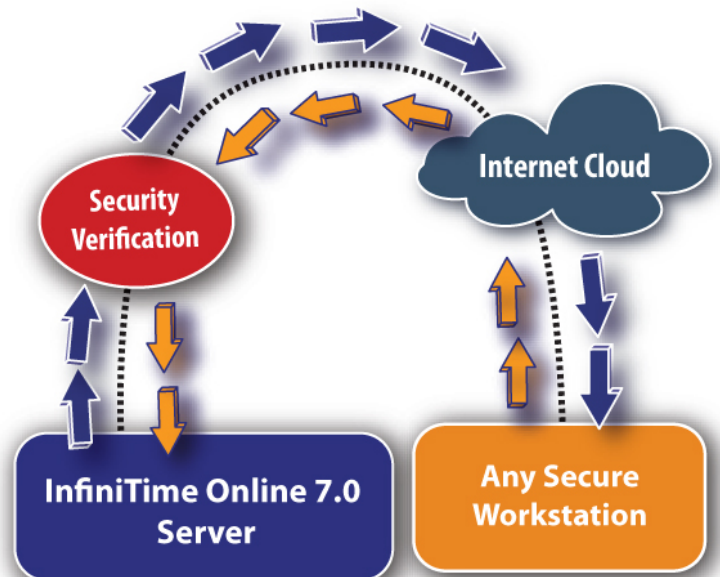

InfiniTime™ Online 7.0 Labor Management System is a true client/server solution based on an **ORACLE 10g** relational database architecture and ASP.net, you can expect fast response time and reliable operation at all times.

By utilizing our hosted solution and our servers, you don't have to worry about data corruption, performance degradation, updating your on-site hardware, or upgrading software. Our servers are constantly updated, backed up, and monitored to deliver a service you can truly rely on.

InfiniTime™ Online 7.0 is a service so you will be billed based on the amount of employees your company is tracking. We also give you the ability to add or remove users and features, to better help you manage your labor management dollar.

InfiniTime™ Online 7.0 also surpasses other web based applications by giving you the option of adding access control systems, biometric terminals, and card reader terminals. InfiniTime™ Online 7.0 can communicate with devices at your location via TCP/IP connection and a static IP address. Furthermore, you can monitor and configure terminals from within the InfiniTime™ Online 7.0 interface, making your life that much easier!

how it works

expandability

Not only does InfiniTime™ Online 7.0 free up your company's resources and make labor management quick and easy. InfiniTime™ Online 7.0 can also be expanded to work better for you.

- ** Add biometric or card swipe clocks at your facility with no extra software to install.
- ** Add access control terminals and operate them directly from the InfiniTime™ Online 7.0 interface.
- * Add the accruals+ module for more complex unlimited accrual tracking.
- * Add or subtract employees online, whenever you need to. We even pro-rate!

** Adding clocks remotely requires TCP/IP connection and static IP address
